EXPERIENCE

Associate Software Engineer | LeadSquared — Forms Team
Bengalore | *[july – Present]*

- Worked as a **full-stack engineer** contributing to both **frontend (React, JavaScript)** and **backend (.NET, C#)** development for the Forms module.
- Delivered multiple **bug fixes and security enhancements**, including **XSS vulnerability mitigation**, improving overall application security and stability.
- Implemented field-level and file-level encryption for the Forms module, securing sensitive customer data across all customers using AWS KMS.**
- Worked with **both REST and GraphQL APIs** for efficient data exchange between frontend and backend services.
- Optimized **UI performance**, reducing form load times by **~50%** and enabling efficient usage under **low-bandwidth conditions (<100 KB/s)**.
- Resolved extensive **cross-browser compatibility issues**, improving performance and reliability across major browsers by **~40%**.
- Integrated **Coralogix from scratch** to monitor **frontend performance, logs, and RUM**, significantly improving observability for one of the most complex modules in the Sales CRM platform.
- Improved overall **performance, scalability, and reliability** of the Forms module, a critical and highly complex component of LeadSquared's CRM system.
- Collaborated using **Git** for version control and **JIRA** for sprint planning, bug tracking, and release management.

Intern – Software Engineer | LeadSquared : Jan 2025 – July 2025 | Bangalore

- Developed and enhanced UI components for LeadSquared's Sales CRM platform using **React.js** and **Bootstrap CSS** as part of the Ace team. Spearheaded the implementation of a new Custom Notification feature, allowing administrators to configure and send personalized email and in-app push notifications for sales users.
- Contributed to bug fixes, UI enhancements, and new feature integrations while collaborating in an Agile environment. Gained hands-on experience with **GraphQL, Figma, Adobe tools, Jira, and Git** commands, strengthening skills in product development and cross-functional teamwork.

PROJECTS

Longitudinal Analysis of Cucumber Moisture Levels: Integrating Image and Weight Data

- Built a CNN-based model to classify cucumbers by moisture level using image and sensor data.
- Enhanced accuracy by combining weight data with image processing and fine-tuning VGG19 with data augmentation.

Hospital Management System:

- Developed a web interface using HTML and CSS for booking doctor appointments.
- Enabled patients to view availability and book slots with specialized doctors.
